Now is the right time to Get Your Career in Gear!

And what are people saying about Robert and Paula?

"After spinning in circles and getting nowhere with my career, I decided to contact Robert. Not sure of what to expect, we met at a coffee shop where we talked in depth about myself and my values, interests and previous work/life experiences. After our first meeting I immediately felt a sense of confidence and determination. Over the next few weeks we dug a bit deeper into my true passions in life. Everything that I had kept buried suddenly started to surface. It turns out I wasn't being true to myself. With Robert's Career Counselling I was able to tap into those core values and interests. He provided me with excellent insight, a variety of helpful resources and the ability to pursue the careers that would allow my talents to shine. His upbeat attitude and down to earth personality make him very easy to talk to.

Once I figured out my direction I sought help with my work search. In came Paula. Her professionalism and willingness to help with better organizing my work search was like nothing I have ever experienced. She also re-vamped my resume and cover letter and it was an amazing transformation. For once in my life I took pride in my accomplishments and it showed on paper! I was so impressed with her prompt responses to my emails and no matter how busy she was she always made time for me. I have come to realize that resume writing should be left to the experts and that Paula definitely is an expert!

I couldn't have started this new journey in life without the professional assistance from both Robert and Paula. They are both such a pleasure to work with! Thank you!!" **Aimee B. – September 2012**
